

NON-CONTACT TACHOMETER CALIBRATOR

CE 0102TMC is an easy to use calibrator for instant and reliable calibration of Non -Contact tachometers upto **199999** RPM.

The desired RPM can easily be set using the front panel switches. Since RPM is a function of the frequency, the bright White LED flashes at a value nearest to the set RPM and the actual RPM/Frequency is displayed on the 2 Line Backlit alpha numeric LCD display. The calibrator is lightweight and operates at a standard input voltage of 230V,50Hz.

SPECIFICATIONS

Operating Voltage: 230V,50Hz
Accuracy: 0.2% +/-2Digit
OUTPUT: Bright White LED
Display: 16char x 2 Line Backlit A/N LCD.
Setting: By 4 Keys on front Panel.
Case: Powder Coated ,MS, Table top
Dimensions: (LxBxH) 170mmx130mmx90mm
Weight: 900gms(Apprx.)
Operating Temp: 45Deg C Max.
R.H.: < 90% NC.
